PROFESSIONAL SUMMARY

Information Technology graduate with a completed HND (HNDIT) from SLIATE Labuduwa and experience as an Associate Software Engineer. Completed a Full Stack Software Engineer Internship at NAITA Head Office with strong skills in Django (Python), RESTful APIs, PostgreSQL, React, Tailwind CSS, and Flutter. A fast learner with strong problem-solving and teamwork skills, passionate about building scalable, real-world software solutions.

EXPERIENCE

Full Stack Software Engineer Intern, 09/2025 – 03/2026
NAITA - Head Office, Digital Strategic and System Division (DSSD) Rajagiriya, Sri Lanka

- Developed and maintained RESTful APIs with Django and Python, including authentication and role-based access control.
- Designed and managed PostgreSQL and SQLite databases with schema design and data validation.
- Integrated backend services with React + Tailwind CSS frontend, building reusable UI components.
- Delivered end-to-end full-stack modules, including API development, frontend integration, testing, and optimization.

EDUCATION

Higher National Diploma in Information Technology, *SLIATE GALLE* 2023 – Present
2023 Reading for a Higher National Diploma in Information Technology, Sri Lanka Sri Lanka Galle, Sri Lanka
Galle, Sri Lanka Institute of Advanced Technological Education (SLIATE). Lanka

Advanced Level, *St Thomas Collage* 2021
Completed with three (C) passes in Art stream. Matara, Sri Lanka

Ordinary Level, *St Thomas Collage* 2017
Completed with four (A) passes, three (B) passes and two (C) passes. Matara, Sri Lanka

SKILLS

Mobile Development Programming Languages
React Native | Flutter Python | Java | C# | JavaScript |
Dart | SQL

Version Control and Platforms
Git | GitHub | VS Code | Figma

Backend and Database Web Development
Django | Firebase | MySQL | SQL Server | SQLite |
React | Next.js | Tailwind CSS | HTML5 | CSS
PostgreSQL

Soft Skills
Teamwork | Communication | Problem-solving |
Time Management

PROJECTS

IETI Website - Full-Stack

- Developed full-stack web application with responsive frontend, backend APIs, and relational database integration.
- Implemented role-based authentication, dynamic content management, and optimized system performance

Service Desk System - Full-Stack

- Developed backend with RESTful APIs and database integration, plus selected frontend components.
- Delivered end-to-end modules ensuring reliable performance, error handling, and smooth data flow.

AETI Website - Full-Stack

- Developed a full-stack web application with a responsive frontend, backend APIs, and relational database integration.
- Implemented role-based authentication, dynamic content management features, and optimized overall system performance.

Flow Case Management System, Individual Project

- Flow Case M is a secure legal case system using React and Supabase with encryption, authentication, and real-time alerts.

Resturent Management System, Individual Project

- Restaurant Management System built with React and Django, featuring order management, menu handling, billing, inventory tracking, and admin dashboard.

Saloon Booking System

- Web-based appointment booking platform for salons. Users can register, log in, and book services online with real-time data handling.
react,tailwindcss,firebase hosting,firebase auth,firebase firestore

Online Maths Learning Platform

- Developed a web-based LMS with student management, payment tracking, class scheduling, and Zoom integration.
JavaScript, React.js (19+), Tailwind CSS 4, Python, Django REST Framework (DRF), JWT,SQLite
